

The lights have been installed at Webster City's new football field—on six 50-foot and one 80-foot steel poles. Harley Rollinger, head grid coach and athletic director of the Webster City Community School district, said this morning that this field will be one of the best-lighted in the state. A new perimeter fence (in foreground) has also been constructed. The new high school buildings are in right background. First varsity action on the new field is slated for Sept. 27, when Hampton comes here.
